Adriana Eka Prayudha

INTRODUCTION

ABOUT ME

I'm [Adriana Eka Prayudha](#) – a software developer with [3+ years experience](#) and expertise in building high-performance, secure, and SEO-friendly websites. With a good background in product development and also AI integration, I focus on delivering efficient and scalable solutions. My approach ensures smooth execution while maintaining high-quality standards, allowing my partners to confidently handle client communication while I take care of the technical side.

Case Studies

Informasi Keberangkatan KA Train Departure Information			
Stasiun Gambir		01/03/2023	12.34
Waktu Time	Peron Platform	Kereta Api Train	Tujuan Bound for
15.40	1	74A Brawijaya	Malang via Cirebon, Semarang Tawang
16.40	2	12A Argo Sindoro	Semarang, Tawang via Cirebon, Pekalongan
17.10	2	78 Bima	Surabaya Gubeng via Purwokerto, Yogyakarta
17.20	3	74A Argo Cheribon	Tegal via Cirebon
18.30	1	75C Gajayana	Bandung via Cileahi
18.40	4	78 Sembrani	Malang via Yogyakarta, Madiun, Blitar
19.00	1	28A Argo Cheribon	Bandung via Cileahi
19.40	4	75C Argo Sindoro	Malang via Yogyakarta, Madiun, Blitar

KAI Digital Signage

I once had the opportunity to work on a fairly large project for PT KAI Indonesia, which involved developing a centrally controlled train departure and arrival screen.

At that time, I developed the MVP, including the departure screen, arrival screen, and platform information, using Laravel and jQuery.

Tech Stack:

Laravel, Javascript, JQuery, MySQL

POS Properti Internal App

I work on several internal projects from Pos Properti Indonesia, including creating a web service for payment integration with local banks in Indonesia, used in internal POS applications in several business lines, namely PointArena and PointLab.

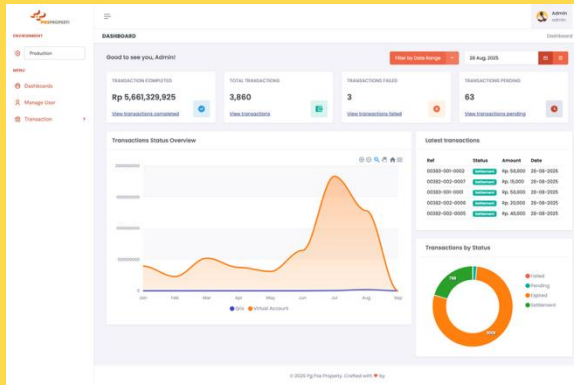

Then I also helped develop a web app for e-signing documents. The technology I used for developing the services is Node.js with Express.

Tech Stack:

Laravel, React, Node.js, PostgreSQL
